Alex Morgan / DEMO-1 / Entirely fictional demonstration data

These excerpts illustrate how evidence can support configured ratings. They were authored for this sample; no live recording exists.

Knowledge assessment

Reference: SAMPLE-written / Rating: Evidenced

Two of two fictional multiple-choice answers matched the sample key.

Explains assessment priorities

Reference: SAMPLE-medical / Rating: Evidenced

Fictional response: I would start by clarifying the patient’s symptoms and assessment priorities.

Explains scene coordination

Reference: SAMPLE-trauma / Rating: Partially evidenced

Fictional response: I would assign a team member to collect additional scene information.

Organizes the handoff

Reference: SAMPLE-medical-handoff / Rating: Evidenced

Fictional response: I would summarize the presenting complaint, findings, actions, and reassessment.

Summarizes outstanding concerns

Reference: SAMPLE-trauma-handoff / Rating: Partially evidenced

Fictional response names the presenting concern but leaves reassessment priorities incomplete.

Explains the reasoning

Reference: SAMPLE-follow-up / Rating: Evidenced

Fictional response: I would explain the evidence supporting my plan and reassess for change.
